INTRODUCTION

My interest in learning new technologies has driven me to become a frontend-focused software engineer with 1.5 years of professional experience. Working on industry-level projects and contributing to university organizations has honed my professional and teamwork skills. I prioritize writing clean code and excel in learning quickly and adapting to various situations, making me a good fit.

EXPERIENCE

Software Engineer (Frontend)

Techsist Ltd.

March 2023 - Present (1.5 years)

- Designed and developed highly responsive and interactive user interfaces using ReactJS.
- Built web components that are reusable and can be reimplemented in the future.
- Developed projects like portfolio, dashboards and institution management web apps.
- Collaborated with backend and product team members to integrate APIs and implement new feature developments.

EDUCATION

American International University-Bangladesh

(AIUB), Dhaka

BSc in Computer Science and Engineering

2018-2022

EXTRACURRICULAR

AIUB Computer Club

- By volunteering and working as a graphic designer, I gained experience in teamwork and leadership.

BASIS Student's Forum

- Volunteered for 'Youth Fest 2018' which was held by BASIS.
